MEETINGS.

TO THE MEMBERS OF THE AUSTRALIAN MUTUAL PROVIDENT SOCIETY.

LADIES AND GENTLEMEN,—I am one of the Directors retiring by rotation at the next annual meeting, on the 24th proxime, but am eligible for re-election. It was my privilege and honour to be one of the first Directors, and I have been a member of the Board during a large portim of the Society's existence. I shall not canvass for votes or ask for proxime. Such a practice I believe to be undesirable in an institution involving the interests of many thousands of members, and the investment of more than one million of money.

I shall have great pleasure in serving, to the best of my I shall have great pleasure in serving, to the best of my ability, the Society, if you again place me in its direction.

I am your obedient servant,
JOHN FAIRFAX.

HERALD Office, March 15, 1872.

BANCHORY consists of four (4) blocks of country, DARCHOLI CONSISTS of 100T (4) DOCES OF COUNTY, costs hing an area of 250 square miles.

The stock thereon numbers 20,000 sheep, 315 head of sattle, and 52 horses.

Paddocks exclosing 128 square miles have been formed.

The run is intersected with numerous creeks, and the country contains very rich flats with salt bush and herbago.

The sheep are of first-class quality, and the wool gives satisfactory returns.

itsfactory returns.

18LAY PLAINS, unstocked, contains 147 square miles of country; there are sufficient improvements for carrying on this property as a separate station, but it has been, and can again he, worked in conjunction with the Banchory run, from which it is distant 26 miles.

Further information can be obtained on application to Mr. G. F. WANT, Pastoral Exchange, 272, George-street Reference.

FOR SALE, a superior young COW and Calf, 14 quarts; £8. 66, William-street.

LIGHT RAILWAYS.

FO THE EDITOR OF THE HERALD.

Sin,—As the idea that any railroad of a lighter construction and less cost than y railroad of a lighter construction and less cost than those now in formation in the colony could be made, has always been pooh-poshed by the segacious foliar with have, for tunnately for themselves, had the power of deciding in the matter, allow me to introduce to your readers the following fact.

There is at the present time, and for three years past has been, a railroad in full working order from Sord to Drummondwille and Athabaska, on the Richelieu River. Canada. It is ef wood; the time, or alsepera, are notched to receive the rails, which are of seven by four inch stuff, fourteen feet lengths, and keyed in the same, as the iron rails are in the chairs.

The cost of this lims, with nine stations, car, and locomotive dopot, repairing shop, engine, and lender, two passenger cars, eight grain cars, and twenty-five wood cars, was five thousand dollars, or about one thousand pounds a mile. It is a single track, four feet sight and a half-inch gauge. A bridge on the line over the Tunnats river cost thirty-five through dollars, or about not thousand pounds extra. The rate travelled at on this line is twenty-five miles an hour.

I have submitted this feet to wow readers traveline that

heer. I have submitted this fact to your readers, trusting that some movement may be made in the way of preenting us cheep railways. What can be done in America can be done here, and I foncy of as small a cost.

Sydney, April 20th, 1872.

INSOLVENCY COURT.

MONDAY.

BEFORE the CHIEF COMMISSIONER.

In the estate of John Webb, a special mee'ing. Insotvent and another witness was examined by Mr. Salomens on behalf of the official assignee, and the meeting was adjourned.

on behalf of the otheral assignee, and the moving was adjourned.

In the estate of Edward Jekyll, a special meeting. Insolvent was examined by Mr. C. Evans on behalf of the official assignee, and the meeting terminated.

Horsemb, second meeting, at East Mailland; Ellen Molfatt, dist and only meeting.

COURT BUSINESS.

Thursday, April 25, at 11 a m.—Before the Chief Commissione: Accounts current and plans of distribution for confirmation in the undermarkioned estate:—Ist, Estate of Maximilian Luna, a first dividend of 2s in £; 2nd, Estate of Charles William Keels, trading as Kreis and Co.), a dividend to the distribution of the control of the confirmation of the confirmation of the control of the control of the confirmation of the control of t

CENTRAL POLICE COURT.

Manylar.

Before the Mayor and the Folice Megistrate, with Measta. Plence, Murphy, Merriman, Smart, and Charlton.

The first case called on was No. 22 on sheet No. 2—Jreeph Wells, charged with having ben thrice on violed of drunkenness within the last twelve months, and with behaving in a ricotus manner in King-street on Sunday morning. He denied that he was either drunk or behaving in a ricotus manner at the time alleged. Constable Mi Donagh deposed that between 2 and 3 o'clock on Sunday morning he found the prisoner knocking at the door of a house in King-street, and challenging some one to some out and fight; he took him into custody for ricotus behaviour; he resisted so much that "it took three or four of us a half hour to take him to the watchhouse;" he had had some drink, but witness would not have taken him into custody for drunkenness—he may have been half drunk. By prisoner: On the way to the lock-up, you called upon a gentleman to take notice of your state, whether or not you were drunk; did not hear him give his name and address. Serjeani Mi Ray produced three certificates from the clerk of Petty Seasious to the effect that Joseph Wells was convicted at this Court of drunkenness on the 5th and 29th January, and 11th March of the present year, and identified the prisoner as the person referred to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered to in each certificate. In reply, the prisoner metered by the contable, nor had he boan disthing lately at all. The Mayor told prisoner that he saw him rolling about the streets drunk or friotos on the which prisoner replied that he was at home at work, and not in any street all day on Friday. To be imprisoned t

The retail price of COKE is at present 8s per chaldron, deliverd free of charge for carlage at any place within the toundaries of the city; and at 2s per chaldron at any place to the city; and at 2s per chaldron at any place to the city; and at 2s per chaldron at any place to the city; and at 2s per chaldron at any place to the city boundaries.

For places at a greater distance parties should make their own arrangements as to carriage.

A discount to purchasers of 50 chaldrons and upwards.
Orders to be addressed to the "Storekeeper, Gas Works, 22nd April, 1872.

HORT WOOD.—ORDERS for SHORT WOOD will be received by Mr. TAYLOR, COMMISSION EXCOMMENCIAL

BY THE UNDERSIGNED

Rx Ben Lomend,
Pure Shorthorn Bull "PRINCE ERNEDICT," roan, claved Rowenber 26th, 1880, by Royal Benedict (27348); dam (Fenny Royal) by Royal Oaks (16570).

Ex Parramatia,
Pure Shorthorn Cow "LASSIE OF KENT," roan, calved February 26th, 1867, by Kentish Led (2207); dam (Miss Eau) by The Beau (12183).

Ex Commissary,
Pure Shorthorn Bull "PRINCE CHARLIE," roan, bred by her Majesty the Queen at Windsor; calved June 28th, 1867, by England's Glory (23589); dam (Pauline) by Royal Oaks (16570).

Pure Shorthorn Cow "LASSIE OF KENT," roan, calved February 26th, 1867, by Kentish Led (2207); dam (Miss Eau) by The Beau (12183).

Ex Commissary,
Pure Fhorthorn Bull "PRINCE CHARLIE," roan, bred by her Majesty the Queen at Windsor; calved June 28th, 1867, by England's Glory (23589); dam (Pauline) by Britisher of two care, a pair of boots, a chirt, several obots, belt in the british Prince (1417).

Fure Shorthorn Cow "LASSIE OF KENT," roan, calved June 28th, 1867, by Kentish Led (2207); dam (Mission) and the Herald Road (2007); dam pairs of trousers, a pair of boots, a shirt, several other articles, and Sa. or Se, from his purse—the value of the whole being about £8; the coat, trousers, boots, bott, and scar before the Court (which prisoner wore at the time of apprehension) he identified as some of the articles stolen from his room on Thursday night or Friday morning, tuens Stanley deposed that, on Thursday, prisoner came to lodge at her house, and she gave him a bod in the same room with Mr. Beetham; she did not see him on Friday morning. Prisoner offered modeface, and was committed for trial.

The same prisoner offered modeface, and was committed for trial.

The same prisoner was also committed for trial on a charge of stealing from Miss Stanley's house, on either Thursday night or Friday morning, a dirk, of the value of £10, the property of Hugh Minnes, but for which Miss Stanley is liable to the owner. It was found in plodge with a pawshroker named Hamilton, who identified the prisoner as the person who pawned it to him.

Sydny Rombridge was summarily convicted of stealing

is made to the owner. It was found in plonge with a pawhlocker named Hamilton, who identified the prisoner as the person who pawned it to him.

Sydney Rozbridge was summarily convicted of stealing pigeons, the property of Daniel Sims, and was sentenced to pay a penalty of 20s., or to be imprisoned one mouth.

On the summons paper were ten cases, of which one was perponed and four were net prosecuted. Jeremish Hurphy appeared on summons to answer as information in which James B. V. Mein alleged that defendant is the father of Daniel Murphy, a child sent to the public Industrial School, and, although well able to contribute to the maintenance of the said child, has hitherto neglected to so. Defendant admitted his paternity of the boy Daniel Murphy now on board the Vernon. James S. V. Mein, superintendent of the Vernon, produced the warrant of Messrs. Pearce and Spence, Justice; of the Peace, authorising him to receive Daniel Murphy, on board the Vernon. Gheard A. Cantor, of the Treasury Department, deposed that no money has been paid for the support of a boy named Daniel Murphy on board the Vernon. George Waters, acting sub-inspect of police, deposed that defendant carries on business in Bathurst-street, occupying three shops—one as a pawn shop, another as a drapery shop, and the third as an ironmonger's shop; he keeps a horse and vehicle, in which he frequently drives his family shout, and is the holder of some freehold property in Kent-street. The Court made an order requiring defendant to pay the sum of 10s. weekly for the support of his child. Jelly v. March was an udsfended proceeding under the Tenante' Act, in which can-plasmant obtained a swen days' warrant of possession. In Holland v. Durend, for threatening language, the defendant was bound over the 25 to keep the peace six months; and in Davis v. Anderson, for using insulting words, the defendant was fined 5s.

PRIDAY.
BEFORE Mesers. S. Goold, Loster, Neale, Metcalfe, and Williams. Fifteen persons found drunk in the streets, were severally Fifteen persons found than an an extendition to bring fined.

Ellen Spence and Patrick Lowes, in addition to bring fined for drunkenness, were each ordered to pay a penalty of 10s., in default four days in good, for making use of obscene language.

Joseph Sardiner, for being drunk, and wilfully destroying a constable's uniform jumper, was fined 20s., with the alternative of eight days' incorporation.

William Wags was sent to gool for three months, for stealing a tomahawk, valued at 6e., the property of Walter Christie.

Thomas Podgers, summoned for using abusive language to Gustave Bucham, was ordered to pay a penalty of 40s., with 9s. 10d. costs of Court, and 21s. professional costs.
John Wilson was brought before the Court on remand, charged with stealing knockers from the doors of Mr. Craddeck and Mr. Powers, Rilly-street. Evidence was given showing that prisoner broke the knockers off the doors on Friday night, at 11 o'clock, and afterwards wont into Hoins Hotel, where he was arrested with the knockers in his possersion. The Bench did not consider that prisoner took the knockers with any folonious intent, and as he had been locked up since Friday night, they would discharge him, with a caution not to indulge in such foolish larks again.

RIFLE SHOOTING.

CN Saturday a match was fired between No. 1 Company and No. 5 Company 1st S. B. V. R. This being the last match to be fired with the old Enfield rifles, considerable interest was felt in it, especially as No. 5 was the winner of the challenge tugle at the late Rifle Association matches. It was on account of No. 5 winning the bugle that No. 1 issued the challenge, as it appears they thought they were not beaten on their merits on that occasion. The conditions of the match were as follows:—14 men saide, 5 shots each at the ranges of 200, 500, and 600 yards; 200 yards standing; any position beyond. The lowers to provide powders to be presented to the highest scorer on each side. Corpural Lacey was top accore on the part of No. 1, with the fine score of 44 points; and sergeant Foskett on the part of Lacey was top score of the part of factors of 40 points; and sergeant Foskett on the part of f, with the good score of 40 points. The westher was with a steady hreeze from N.B.; the last two or three de were fired after sunset. The following are the No. 1 COMPANY. 200, 500, 600, Total.

No. 1 winning by 103 points.

At the same time as the above, No. 5 competed against the Kiana corps; the same conditions, with the exception that no pewters were competed for. This is the first match that Kiana has fired against a metropolitan corps, and the members are to be congratulated on being victorious. It should be neationed that the Kiama corps fired last month, the scores being forwarded under seal. Lieutenant Strong of the New South Wales Infantry, arted as unpries for the Kiana Corps, and at the conclusion of the firing spened the scores, and found that Kiana had beaten No. 5 by 35 points. Mutual cheering took place, between No. 1 and No. 5, and No. 5 decrees—

No. 5, and No. 5 gave three cheers for Kiama, and expressed a hope for another contest. The following are the scores—

THE WESTERN AGRICULTURAL SHOW.

(From the Bathurst Times)
THE Show held on Wednesday last, cannot be said to rank among the most successful of the exhibitions held by the Associatin, and this is to be attributed mostly, perhaps, to the unfavourable nature of the season and to the late period at which the Show was fixed,—both causes contributing seriously to affect the competition in horticultural exhibits.

the unfavourable nature of the season, and to the late privid at which the show was fixed,—but causes conpributing seriously to affect the competition in horticultural exhibits.

In blood stock the show was poor compared to last year. Mr. Mayne's Flying Pienan was the only scillion exhibited and Mr. T. Lee showed two certainly beautiful mares, one of them being Lilla, the dam of the celebrated Javoin; and these, with three cotts and two fillies, completed the list.

The di-play of cattle was unquestionably one of the finest we have ever had, the number of animals being so great as to render the prins allogether inadequate to contain them, so that several had to be toped outside the fences. The Durham breed was, as usual (chains to the Lees), will represented, whilst in Herefords we had for the first time a nin-trous and really genuine show. The prizes for the best bull and cow fell to Mr. Charles M-Phillamy, whilst for young stock Mr. John M'Phillamy distanced all competitors. As this description of cattle is new to the district, we consider, it is important that intending breeders should know something of the animals upon which they are to rely as the pregrentures of future herds, and for that purpose we give the pedigrees of the animals exhibited by Mr. John M'Phillamy, being the only once we were able to procure:

— The Earl of Cork (Hereford buil) calved May 1871. Got by Young Carlisle, dam by Young Carlisle, and by Young Carlisle, and my Young Carlisle, and by Thurston (imported); g. g. dam by Thurston (im

great.

Within the shed, products of the flower and kitchen garden were, as might be expected from the late period at which the Show was held, inferior in quality and quantity to the displays of former years; but in cereals we never remember seeing the exhibits surpassed. In wheat, the competition was good, Mesers. Hurst, Cunningham, and Hancock carrying off the prices in the order named.

The division set apart for poultry was crowded to excess.

The division set space is presented in wines, there was no competition to speak of, but a red wines manufactured by Mr. J. N. Macintosh not only gained the first prize, but obtained a rider, in addition to the sward of the judges, to the following effect:—" Very good, Highly approved of. Worthy of every commendation."

PURB AIR.

Sir.—Being a lover of pure air, which I wish all my fellow-creatures to enjoy, I was much edified in reading the letters of Dr. Lankester on pure air in your journal. Now, it is a fact, whith a short distance from your office there are small houses of four rooms, and some less, with a family to each recep, and no ventilation to them; most of the saches at the top being fast, and no opening in the cilings to allow the foul air to ecsope. I would this to see the Government pass an Act to make all buildings for the futures to be ventilated, and I would call on all the architects and builders in the colony, who have any fellow feeling for mankind at large, to place air brids in the walls and a piece of perforand zinc in the ceilings of the buildings they may have to put up, as it can be done at so triffing a cost, and they would have the bleasings of thusands. And if the Health Officer of the town was to be empowered to look into those dwellings and see that they were ventilated, the expense would be saved by having a bealther population and a less drain on the hospital and other charitable institutions of the colony. The want of pure air in the dwellings of the poor is visible in their countenances and the sallow and slexity-looking children we see about, very different to what we saw thirty years ago.

I do trust the landlords of small tenements, for the love of their rent, in accirc the later of the property of their rent, in accirc the later of their rent, in accirc the later of the property of their rent, in accirc the later of their rent, in accirc the later of the property of their rent, in accirc the later of the property of their rent, in accirc the later of their rent of their rent in accirc the later of their rent of their rent in accirc the later of their rent of th

ago.
I do trust the landlords of small tenements, for the love
of their rent, in seeing their tenants healthy and able to
work to pay their rent, will see about having all their
houses ventileted, as it can be done at so small a cost and
little inconvenience to the tenants.

J. STHART.

THE PREROGATIVE OF DISSOLUTION.

Burn, H. 19 and Lie of Bismones was the part of the company of their compa

And the part plays applications of the control of t

specified, that one which is situated in the most level put if the country should be chosen. It must be must level the more involved the more in more and in more and in more and in the more in the m

the extent of country that forms the watershed of the dam, and the valocity at which the water is known to flow in time of flood, must determine the height of the embinkment above the bank of the gully. If the banks of a guly be level with each other, or nearly to, then a by-wash must be constructed with posts, &c., at each ead of the embankment; in which case the latter will not need to be built quite so high as if only one by-wash were used. In some localities, by a judicious selection of the site for a dam, an artificial by-wash may be dispensed with altogether, and a natural one found—up stream of course—either in some slight depression of one of the banks of the gully, or through some branch thereof, which will allow the surplus water to flow by without subjecting any portion of the embankment to its action; and which will, moreover, very often be found to lead the water back again into its original channel, after it has passed by the place where the dam is situated. In a level country the outlets in question are frequently met with at a considerable distance from the dam. Where a natural by-wash is used, the permanent height of the embankment will need to be only the same as that of the lowest bank of the gully where the dam is built. But it must be constructed in such a manner, and at such a spot, that the superfluous water will be able to pass through the by-wash, before that which is in the dam will have risen to within at least three or four foot of the top of the embankment.

It is scarcely necessary to add, that a natural by-wash is preferable to an artificial one both on account of conneny and safety. But whichever be used, the natural surface of the ground, over which the running water is to pses, should remain intact; because, after the turf is removed the water will speedily cut a deep passage for itself into the solid ground, and this will of ourse allow too much of it to run to waste. The writer knew a large dam to the order to guard against the recurrence of a similar mishap.

If an artificia

particular, than from all other causes combined.

After an embanament is faished, and trimmed to a uniform surface, it will be benefited by being sown, either with lucerne or grass seed, either of them will masterially assist in binding the loose earth together into a compact mass.

In dismissing the subject of dam-making, it may be marked that it is bardly advisable to erect a dam in a gully whose bed consists of rock, gravel, or sand, because of the loss of water that will ensure from filtration, which will be enormous, if large quantities of these exist in the storage ground.

To erect a substantial water-tight dam of servicesble magnitude, and construct its attendant by-wash of materials that are capable of resisting the uninterrupted action of running water, are such expensive operations that they are very selfom attempted by individual enterprise. Moreover, it hardly ever happens that a dam is required where there is a constantly rounsing stream, and therefore it is quite needless to enter upon a description of the different works which would be necessary in such a case.

A case of disputed age, involving the question of DENTITION, is attracting some interest in England. It is that of a heifer calved in January, 1870, and at that time carefully entered in January, 1870, and at that time carefully entered in the private herd book of her owner. She was a prize taker in 1870 as a calf, and in 1871 as a yearling. Last summer she was placed high at the Essex show, but was objected to on account of her having "four broad teeth." A learned professor has given it as his opinion that four broad teeth are conclusive against the heifer being under two years old, "the earliest period for four teeth being two years and six weeks."

The owner says that smart forcing will interfere with the course of nature, and no doubt this is the case. It may be wrong to force on such precedity, and it is no doubt possible to do it, and in this case the standard of dentition cannot be appealed to to settle questions of age with invar

BROKER:

Mr. Josiah Mullens.

This Company is formed to work certain copper sections secured on the known by the section of queensiand being easily convertible into freehold. The lessehold perticular the internal regulations of Queensiand being easily convertible into freehold. The surrounding country is heavily disbered, and good fire-clay and limest are are abandant in the immediate mighleumbod, so that the mine commands all the access ares for the cheap reduction of the ore, while its position (within eighty miles of Gladstone) secures delivery of the copper in hydroy at so cal tittle over 25 betton for land and water carriage.

The saving in fuel and transport, as compared with the cost of these items to more inland mines, will of itself smount to a bandeome dividend.

The Kroombit Mine has been well tested, a great deal of labour and money having been expended upon it. Five shafts have been sunk, three valuable lodes proved to a considerable depth, and other lodes are known to run parallel to those opened up.

The surface indications are most promising; the different lodes have been traced at various points for 20, 60, and 100 fathoms, running generally about 4 feet wide. And so far as sinking has been done, the results obtained have been in the highest degree satisfactory; the lodes showed, with good underlay, increasing in width and improving in richness as they go down.

the regular hanging and root wails, well defined, with good underlay, increasing in width and improving in richness as they go down.

Shalt No. 1 is sunk 35 feet. At the surface the lode is 4 feet wide, of grey ore and carbonates equal to about 20 per cent. At 20 feet the lode widens, composed of soft gorsan, grey see, and carbonates. At the bottom the lode changes to a rich yellow ore, coated black. Here the width is not ascertained, the ore being only out into for a foot or two—not through the lode.

Equally satisfactory results have been obtained from the other sharts, but details need not be recapitalisted here as they are embodied in the reports (pregress and concluding reports) to be had from the brokers.

It may be mentimed, however, that before engaging in this venture every possible precaution was adopted by the proprietors to assure themselves of the genuine value of the property. Captain Pascoo, one of the mast experienced Adelaide Mining Captains, was specially sent up to inspect and report. An assay was obtained from Mr. Paterson, of the lamk of Australasis in Melbourne, shewing an average of about 35 per cent.—some of the samples running as high as 46 per cent.—And a trial shipment was made to Newcastle Smelting Works which returned 194 per cent. of pure copper.

As to this shipment it may be explained that the metal

made to Newcastle Smitting Works which returned 19‡
per cent of pure copper.

As to this shipment it may be explained that the metal
was selected by local labouring men, who, ignorant of its
value, carefully excluded the black sulphurets which it is
thought would have raised the parcel well up to sample
average.

Captain Pascos reports generally, after giving details:—
"I consider this a valuable property. Twelve men could
raise 20 per cent, ore to supply a farnace. The ore is found
in sandstone of good character for yielding large quantities
of covper."

f copper,"
Bubsequently be writes:—" Were a furnace erected and

Eubequently he writes:—"Were a furnace erected and a shaft stunk thirty fathons, we shall raise enough to pay for the work and furnace in doing the work."

W. Smith, another South Australian of great copper experience, after describing the nature and extent of the ore, says:—"This block will turn out a most valeable mine; when malachito is on the surface, it is generally found that rich lodes are to be got by sishing."
Subsequently he writes:—"My first report has been fully confirmed by the shalts sunk, all opening good lodes of ore."

Mr. James A. Allen, also an experienced miner, who was engaged on the ground, reports:—

"There are several small shafts down on the course of the lodes, the deepest is about thirty feet; near the surface the ore is very gossany and intermixed with considerable quantities of spar, but the lode solidine in doscending, and the sulphurets appear in larger quantity; the lode has increased to about four feet, and here the whole contents of the lode as raised to grass will dress up to from 20 to 25 per cent, copper, with the loss of only about one third of its wright.

"I have been identified with copper mines for many years, have inspected most of the mines in New South Wales and Queensland, viz:—The 'Icely,' 'Culis,' 'Peak Downs,' Rosewood,' 'Good Hepe,' 'Currawong,' 'Rosewood,' 'Good Hepe,' 'Currawong,' 'Rosewoo

cc., and unhestatingly state that the yield from this ice as raised surpasses anything I have yet seen in the colonies."

The above extracts are taken from the progress reports.

The concluding report (from Mr. A. M'Dunald, also a mining captain of some twenty year's home and South Australian experience) which is dated 19th March, 1572, minutely described the work done, the results obtained, and winds up thus:—

"I have no doubt if it were now judiciously and properly worked, it would turn out one of the richest mines in the colosy. I was engaged at the opening of the first-class Adelaide Mines, and am as or more favourably impressed with your prospects than any of them."

The returns to be anticipated from the efficient working of this Mine are unquestionably large. These returns it is estimated \$10,000 or \$15,000 of judicious outley will suffice to recure under the special advantages of facility of working, cheapness of fuel and carriage, and moderate amount of Company's capital. The copper from Kroombit will, it is estimated, out delivered in Sydney, about \$35 or ten, so that even at great reduction in at present value there will be an ample margin for profit.

There are several adjoining sections in third hands which it may be found advisable to secure, and it is proposed to take power in the Deed of Association to increase the capital in order, if thought desirable, to purchase one or more of such sections by cash or paid-up shares.

The Propristors take no money whatever from the Company even to cover peat outlays, but the expanses from this date will form a charge sguants capital.

The shares will be allotted in the order of application. Form of application for charce, the company capital from a theory of the order of application for charce, the order of application.

late will form a case of the order of approximate will be allosted in the order of application for charce, prospectus, reports, &c., may be had from the Ercker of the Campany.

OSIAH MULLENS, Pittedroct; or from LITTLE and PILE, 61, Margaret street; S. L. BENCUSAN, Spring-treet, Mining Aponts.

BAGS for tin and copper ore, flour, pepper, and a sgar-SAMUEL HEBBLEWHITE, George-street,

The undersigned has still for SALE, TRN FORTIETHS of a FULL SHARE in RAPP and CO'S CLAIM, Hawkins Hill, at the rate of £12,500 for the chare—say £512 les, tor foreight. Bapp's is the largest of the rich claims, being one-fifth larger than Krohmann's, and twice the size of Carroll, Beard, and Co's. The advantage of buying into Rapp's may be seen by referring to quote tions of sales made this day, which show the following voluntions for the respective claims.

Krohmann's, 5 men's ground £160,000

Rapp's, 6 ditto ditto 75,000

Mosers. Rapp and Co. have been about five or six weeks on Krohmann's veins, from which they are now getting excellent stone, and which are widening out, and give every indication of being fully as rich as in Krohmann's claim at a corresponding depth, say about 25 feet lower. As the time allowed for the disposal of the balance of the share has nearly expired, intending purchasers are requested at once to communicate with the undersigned, from whom say further information may be obtained.

Once to communicate with the undersigned, from whom say further information may be obtained.

The Sydney Morning Berald.

TUESDAY, APRIL 23, 1872.

WE stated that the discovery of tin mines in WE stated that the discovery of tin mines in this colony was an event of considerable im-portance. The mineral is of such great value and such constant and increasing use, that its ultimate effect on the labour and enterprise of the country may be greater than the discovery of gold. It is used chiefly in the shape of tinfoil, being blended with other metals. It is, however, required for a hundred other pur-poses, from the process of dyeing to the manu-tacture of articles of ornament and domestic

The tin mines of Cornwall were celebrated at the very dawn of history. The Phonicians visited that country, and purchased from the natives metal which was probably scattered on the shores. The value of those mines has given them continually an important part in the manufacturing enterprise of England. They still supply a large quantity to the British market, and with copper and other metals have constituted the great wealth of many families settled in various parts of Great litting. The great Carelage timming of St. many families settled in various parts of Great Britain. The great Carclaze tin mine of St. Austell has an open excavation of a mile circuit from 120 to 180 feet deep. It has been worked for four hundred years, and the ore is obtained by repeated washings. The comployment given in the mines of Cornwall was estimated a few years ago at upwards of thirty thousand persons, including women and children. The continuous occupation in mining has constituted it a permanent industry, carried on upon settled principles and by carried on upon settled principles and by minute regulations. The different departments are settled upon a wide experience of risk, of difficulty, and profit. In some wages are paid, in others a share of results, or with both combined. Sometimes, therefore, large returns fall to the lot of the workman. A rigorous supervision, however, is necessary in these as in other mining enterprises, and the examples of fraud are numerous. The mines of Cornwall show remarkable in-

stances of courage and enterprise, of long dence in success before even a gleam of hope sppeared to the spectators. An example is given of a mine carried under the ocean, and the workmen. Ultimately £70,000 was realized from this mine, but it was destroyed by a singular misfortune.

A ship slipped its anchor, ran against the stage and machinery by which the ore had been drawn up, and destroyed the mine. The mines of Cornwall are often supplied with engines of enormous power. As they are sunk to a great depth, and great quantities of water flow in upon them, they can be only kept dry by engines of tremendous cost and size. It is said that the average quantity of water raised from mines in the counties of Cornwall and Devonshire was, some years ago, nine thousand imperial gallons a minute; and yet it is said these mighty engines can be stopped working at any moment by a child ten or twelve years of age. It is a very striking fact that these vast machines work with perfect case and stillness, though the water discharged brawls with in-

cessant noise. The continual employment of miners Commall gives a certainty to that kind of industry. The men have therefore their dwellings, their cultivated gardens, their churches in great number, and their schools. They are not indifferent to any of those pursuits by which the mind is cultivated, and some of the miners themselves have risen to considerable eminence in various departments of science. The evils therefore which result from the loose condition therefore which result from the loose condition of society in some other branches of mining do not prevail, and there is far less of the speculative spirit among the working classes than exists among shareholders and proprietors. This spirit of speculation has been greatly stimulated during the fever crises. Whenever a grand movement takes place in the money market, Cornwall mining appears upon the board. This indeed is inevitable. The history of that county shows that with every new advance in machinery and mechanical power workings previously impossible become attractive, and the enormous wealth occasionally netted, leaves abundant room for the imagination. No amount of prosperity seems to be impostherefore which result from the loose conditi amount of prosperity seems to be impos-

REAT AUSTRALIAN GOLD MINING COMPANY (Limited).

Capital, £7(00, in 7000 shares of £1 each. It is expected that not meet than 100 per share will be required.

Alove Company to be formed for the purpose of working 10 seres in the well-known Golden Gully, Tambarcora. Four (4) distinct reafs are proved to traverse this Company's leave.

RAPP AND CO.'S CLAIM, HAWKINS HILL rible. All that is required to develope the mines is capital. Such is the stereotyped for £1,200 tor tage in the well-known Golden Gully, Tambarcora. Four (4) distinct reafs are proved to traverse this Company's leave. listens to assurances of fifteen or twenty per cent. not uncommonly offered to tempt adventure. It is alleged that even in Cornwall mining is on the whole a losing affair. Still enormous fertunes are realized; of which a few examples may be given. The Crinnis' Copper Mine returned in one year £84,000. The Huel Alfred returned £130,000. The Huel Vor divided £10,000 in three months. On the other hand the North Downs lost £90,000. There is, however, a great distinction made in the value of mines according to the time they have been worked. It is said a "young mine" is likely to last for many years.

The physical influence of mining cannot be

considered favourable. Miners are liable to many accidents, and to some diseases in parti-cular. It is said that they do not live very long. Foul or deficient air, laborious employlong. Foul or deficient air, laborious employment, mineral poisons, and asthmatic diseases, shorten their lives. Means, however, have been taken to diminish the danger, and the great effect of the mighty engines employed will doubtless combat some physical risks, both by transmission and purification. The marvellous application of air in the Mont Cenis Tunnel shows to what extent relief may be given, and labour performed by the same engine. Indeed, in almost every kind of mining industry, when it grows to strength, mining industry, when it grows to strength, the utilization of machinery seems to increase as the metal is more plentiful and less precious; and the permanent wealth of any country seems better supported as profits are small but certain, and labour can be facilitated by mechanical aids. There is a vast difference between the occasional gains of mining when cradles were rocked and the profits of con-stant industry; but the general welfare of society is better promoted where returns are

A large part of the revenues of the Prince of Wales is derived from the mines of Cornwall. The late Prince Albert took great interest in their advancement, and in the welfare of the miners. On one of his visits he was of the miners. On one of his visits he was accompanied by the QUEEN. Of her visit to a mine in Cornwall, a working miner gave the following account: "I could not sleep for the night, thinking what I should say to the Irince, and what the Prince would say to me. Well, in the morning, sure enough, we saw the shay coming. The QUEEN got out and ran about the wet grass like a billy. She asked, 'Is it safe to go into the main?' 'Safe,' says I, 'yes, safe as the rock of Gibraltar!' The QUEEN skipped in like a lamb, and I do QUEEN skipped in like a lamb, and I do believe I touched her. As they were coming out the QUEEN said, 'What is that there blue light that I do see?' 'Bliss you, ma'am that's the light o' day.' We did cheer." This was twen'y-six years ago.

THE total amount received into the Treasury of New South Wales during the quarter ended March 31, 1872, including the balance brought from the previous quarter, was £1,148,838; and the total amount paid during the quarter was £679,097, leaving a balance in hand of

The total amount of revenue proper received during the quarter was £512,510; and the total amount paid on revenue account was £513,191, which included £263,889 of interest on the public debt.

The quarter's expenditure on the general public service was £249,302, being less than the expenditure on that head in the same period last year by £95,839.

Subjoined is a condensed statement of the general account for the quarter, compared with that of the corresponding quarter. 1,271 ... 105,887 ...

Total£1,148,838 .. £645,605 EXPENDITURE AND OTHER PAYMENTS. ended March 31, 1872. EXPENDITURE, March 31, 18; General Public Service .. £249,302 Interest of Debt...... 263,889 23,159 Balance on March 31, 1872 £1,148,838 .. £645,605

The balance at the end of the quarter was held thus:—In the Bank of New South Wales, £418,241; in the Treasury chest, £\$1,500. The public income, or revenue proper, received in each of the last four quarters.

compared with the corresponding periods of the previous year was as follows:— RECEIPTS OF REVENUE.

Quarters 1870-1, 1871-2, crease, crease, June ... £515,287 £510,934 ... £4,353 September ... 458,100 510,110 £52,010 ... December ... 671,205 741,413 70,208 ... March ... 476,444 512,510 36,666 ... Totals..., £2,121,030 £2,274,967 £158,284 £4,353 Net increase £153,931

The first of the quarters shows a small decrease; each of the others an increase. The increase of the last nine months is £158,284; the net increase of the twelve months £153,931, or 7½ per cent. The increase of the past quarter exceeds 7½ per cent.

The principal heads of the revenue in each period were as under :-

The revenue of the quarter shows increase in every item except customs and miscellaneous; that of the year in every item except customs and excise.

The quarter's revenue from customs has increase from existing the property of the customs has increase from existing the customs.

crease from spirits, malt liquor, specific duties under the Act 34 Vict., No. 21, Murray River ustoms, and some minor items; but decrease under the heads of wine, tobacco, tea and

coffee, and ad valorem.

The income from excise, consisting of sugar and distillation duties, licenses, money-order commission, fees and fines, &c., has an increase of £624 for the quarter, but a decrease of £361 for the real.

of £624 for the quarter, but a decrease of £3961 for the year. Stamps have given an increase of £3297 for the quarter, and of £18,463 for the year; the former 20, the latter 30 per cent. Electric telegraphs have produced an in-crease of £2083 for the quarter, and of £4696 for the year; respectively 30 and 16 per

cent.

Railways have brought an increase of £4060 for the quarter, and of £45,086 for the year; the former 5, the latter 14 per cent.

Crown lands have realized an increase of £22,084 for the quarter, and of £47,306 for the year; upwards of 25 per cent. for the quarter, upwards of 10 per cent. for the

The gold revenue has increased £3087 in the quarter, £9420 in the year; the former more than 84 per cent., the latter nearly 46 per cent.
The business of the Mint has taken a vigor-

ous spring, having advanced nearly 22 per cent. in the quarter, and nearly 53 per cent. in the year.
On the whole our colonial revenue exhibits

an elasticity which fairly indicates the general prosperity of our present times.

THE FORTHCOMING ENHIBITION.—The arrangements for the forthcoming Exhibition are progressing as estisfactorily as could be desired. To-day the judging of the wood exhibits will commence. The musical festivals will no doubt prove a very great attraction. Medamo Agatha States, Miss Christian, Miss Lambert, Miss Howarde, Miss Sharpe, Miss de Vere, Mr. Farley, Mr. Braham, Mr. Merta, and Mr. Phillipa, have been engaged as vocalists. Messrs. Krohmann and Co. have advised the secretary of the association that they are sending a number of quarts and gold specimens for exhibition, and amongst them one of the largest lumps of gold that have yet been shown. One of the most interesting features of the Exhibition will be the display of articles from the Pablic schools, in the shape of drawings, needlework, and specimens of writing. Nearly one hundred schools, in and sout Sydney, have signified their intention of contributing appointance of the children's handlown't. From the Industrial schools and several of the charitable institutions of the city, a large number of exhibits are also to be forwarded.

Agricultural Society.—A meeting of the

several of the charitable institutions of the city, a large number of exhibits are also to be forwarded.

AGRICULTURAL SOCIETY.—A meeting of the Council of the Agricultural Society was hald yesterday, at the Rooms, George-street. Mr. Thoms Norton occupied the chair. The minutes of the previous meeting were read and on immed. A motion was then passed authorising the Standing Councilies to pay certain amounts for contracts approved by the Council. It was also resolved that a silver and a bronze medal and certificates of high commendation be awarded to the three best ameteur organists. The matter is to be advertised, and competitors requested to nominate competent persons to act as judges. It was also resolved that a macing of auctioneers be called for Friday, the 26th, at 10 am, in order that arrangoments may be made with regard to the sales by suction of exhibits a backlet from the French Consul, Mr. Bienon, asking the Council to obtain from exhibitors of raw materials portion of their exhibits, to be forwarded through him to France, for exhibition in the various manufacturing districts, where such raw materials were consumed—the object being to extend amongst the people of France a knowledge of the producing exhibitions frow shall wales. In exchange M. Stemon offered to precure samples of goods manufactured in France from such products as were grown by them. It was further resolved the effect that exhibitors should be invited to allow the stewards in each soction to retain samples of the different raw materials, with a view to their being forwarded to the effect that exhibitors should be invited to allow the stewards in each soction to retain samples of the different raw materials, with a view to their being forwarded to the effect that exhibitors should be invited to allow the stewards in each soction to retain samples of the different raw materials, with a view to their being forwarded to the effect that exhibitors should be invited to allow the stewards in each society of the public immediately after the occ vited to appear in uniform. It was also arranged that he secretary's office should be removed to the Exhibition building to-day (Tuesday). This concluded the business of the moeting.

SYDNEY CHAMBER OF COMMERCE.—The quarterly meeting of the Sydney Chamber of Commerce was to have been held yesterday. Half an hour after the advertised time of commencing the meeting, there were present Messra. T. S. Mort, J. L. Montefore, H. S. A. Allan, Mr. John Alger, and Mr. J. S. Mitchell. There not being a sufficient number to constitute a querum, the meeting was adjourned for one week.

Messra. T. S. Mort, J. L. Montemore, H. R. S. Aman, and John Alger, and Mr. J. S. Mitchell. There not being a sufficient number to constitute a querum, the meeting was adjourned for one week.

SVDNEY JEWISH SABBATH SCHOOL.— The annual examination of the children attending this school, together with the distribution of prizes to the more proficient smong the scholars, took place shortly after 10 voclock or Sunday last, at the Masonic Hall. The chair was taken by Mr. S. A. Joseph. Mr. Montagu De Lissa, the hon, secretary of the school, read the eighth annual report and balance sheet. The report stated that out of 173 children on the school rolls there was an average attendance of 113—64 boys and 49 girls. This number, however, does not include 20 children, who, although attending the Sabbath school, have not as yet been drafted it to classes. The report also aliades to the holding of everal private examinations of the school children; which, it is stated, have fully tested "the ability of the leachers, and the apititude and industry of the pupils." It also states "that the models for the current year (the annual presentation of the Baroness de Bothschild) have been awarded to Miss Guldah Sellg, and Master Ernest Davis of hiss Jenny M. Cohen's and Mr. J. E. Myers' classes "—these classes bing further aid to contain reveral other proficients, The balance sheet (as a read by Mr. Montagu & Live Laboure sheet (as a read by Mr. Montagu & Live Sabones moved and Mr. Moss seconded, the adoption of the report, and the motion was duly carried. Mr. Julian E. Salomas moved file second resolution as follows: —"That the challes of the second resolution as follows:—"The health of the meeting be accorded to the Rev. A. B. Davis for his uniting and and energy in the general conduct of the school "Freidenten were cleated as the officers of the after constant assistance and support; and to those ladies and gentlemen whe have so generously devoted their valuable time and attastion; to the one-cons duttes of teachers." VISIT OF THE MAYOR AND ALDERMEN TO THE VISIT OF THE STATE SCHOOL.—At the invitation of the Council of Education the Mayor and Aldermen of the City of Sydney paid a visit of inspection yesterday aftermont to the Kott-street School. At 2 e'clock the following gentlemen arrived in cabe, viz.:—His Worship the Mayor (Mr. Michael Chaptany). Aldermen Goodd, Oatley, Palmer, Mippan, Day, Sutherland, Roseby, Murphy, Maointosh, Raphael, Mr. Matthew Chartton, Mr. Lord (City Regimer), and Mr. Bradridge (City Surveyor). The visitors were rectived at the main entrance to the building by the Hon. G. Allen, Ml. C. (President of the Council of Education), and Messen. John Fairfax, Morehad, and Wikhns, and condected through the school. The infant-cleas, or more properly speaking the babies' clease, as first inspected, and entanised in simple arithmetic and other subjects. The tity and intelligent appearance of the children was the theme of general remark. The justor infants were then brought under the notice of the visitors, and passed there puzzling questions in arithmetic and condected the children of the infants school proper were receiving instruction, and Mr. Wilkins put some rather puzzling questions in arithmetic and passed the proper were receiving instruction, and Mr. Wilkins put some rather puzzling questions in arithmetic and passed to the higher of the infants chool proper were receiving instruction, and Mr. Wilkins put some rather puzzling questions in arithmetic and passed to the boys and passed to the boys and the gentlemen present were treated to some excellent vocal music, and a recitation—The Wreck of the Orphaus—delivered by a yeung uppil who did not appear to be over 10 years of age. The piece was rendered with admirable pathon, and was received with considerable applances. The songs given were— Where the bee sucks," We are the Flowers," Kipp Sirawherines, and "Mining Darion, and "God save the Queen." After making a brief visit to the lawyer and aldermen were conducted to the boys school, were the pupils were subjected to a severe arithmetical text

companies will be in-tructed in this branch.

THE LATE NEW GUINEA EXPEDITION.—A meeting of the committee for the relief of the sufferers by the late New Guinea Expedition was held yesterday afternoo, at Punch's Horld. Mr. E. H. Hargrave was elected to the chair. It was resolved that a statement should be published, showing the receipts in aid of the object to view and the disbursements so far of the funds in band for the relief of those who made claims upon the committee. It was slee determined that the balance remaining should be left in the hands of the treasurers (Mr. J. G. Raphad, M. LA., and Mr. Punch), to be disbursed by them as they may deem advisable. The meeting was adjourned until Intuity each at the lower, in order that all outstanding mitters may be called in.

NUISANCES AT PARRAMATEA.—With reference

NUISANCES AT LABRAMATTA.—With reference to the report of a case beard before the Parasant's Beach in the 16th instant, in which Mr. Spurway was defendant, we have been requested by him to state that he bad so centract with the Newington building-down establishment for the purchase of offal, &c.

CRICKET.—A cricket match was played on the Double Bay Reserve on the 20th, between eleven of the Wavriey C. Chub and a libe number of the Young Alexandria, which re-ulied in an easy videory for the former by one innings and one run to spare. The following were the score: —Waverley C. C., fact imnings, 50; Young Alexandria, 31 and 18 runs.

DEATH OF MR. H. PRINCE. - Mr. H. Prince, for

SUPPOSED DEATH IN THE BUSH.-A correspon-SUPPOSED DEATH IN THE RUSH.—A Correspondent states that reports reached N-rabdi on Thursday evening that a horse, saddled, with value, &c., was found attay in the neighbourhood of Ga athera. Mr. Ollivor, of Ombadello station, was recently at Galathera, and the house is identified as being the animal he rode when he left. It is supposed that some accident occurred by which the unfortunate gentlemen perished in the bush.

A COUPLE OF MONSTERS.—A New Zealand onnal states that Knox and Creighton, two of a band of diphwaymen who had been carrying on depredations in the sighbourhood of Otaki, bad been arrested and taken to analised. They had planned to nurder several settlers, who were to be harpouned, and thrown down deep wooded training.

TELEGRAPHIC DESPATCHES. AUSTRALIAN ASSOCIATED PRESS TELEGRAMS

At Gulgong, on Saturday evening, Asher's general store was burnt to the ground in half an hour. There was no wind, and the progress of the fire was stayed by pulling down the adjacent building. The loss is stimated at £3000. It is supposed that the building

estimated at £3000. It is supposed that the outlains is partly insured.

The presecution of the Sydney Road miners has been stayed by the Attorney-General, provided the road be made good. This is to be done by the Cudgegong municipality.

BATHURST.

At the Quarter Sessions, on Saturday night, the jury in Zimmler's case gave their verdiet at a quartr to 10, finding the prisoner guilty. James Collins, found guilty of manslaughter, at Gulgong, was sentenced to seven years on the roads; one of the witnesses for the defence named Gore was ordered by his Honor to be arrested for perjury, and he has just been committed for trial to the Quarter Sessions. James Employers, was considered by James Finch, tried for rape, near Cudgegong, was

OUR MELBOURNE LETTER.

The first section of our North-Eastern Railway—sbout sixty miles—is now in actual use, the orthodox celebrations, in the shape of luncheons, banquets, and balls, having been brought to a close on Tuesday night; and the regular passenger trains commenced to run on Thursday morning. On one of the festive occasions connected with the opening, the Commissioner of Railways allowed his impressions—formed in Queensland, when inspecting their narrow gauge railways—to leak out. He has evidently returned rather strengthened in his convictions that, for most districts, the narrow gauge is well suited to all the colonies, although, for a main line, such as that which we are now opening, and which is expected ultimately to connect us with Sydney, Mr. Longmore may perhaps not be disposed to disagree with our Engineer-in-Chief, whose convictions in favour of a substantial line such as we are building, are in no way shaken by all the reports that have come to the Government on the subject of narrow gauge and cheap lines in general. At the banquet at Kilmore (which is situated at about two miles from the railway) the Ministry were evidently disposed to be as amiable as possible, and encouraged the idea of a branch railway into the town with a Fairlie engine, to climb the hill which rises as precipitously from the valley of the railway as does Lapstone Hill from the Emu Plains. We should, therefore, have a rival to your Great Western zig-zag on a railway of five or six miles long, two-thirds of which would be made up of zig-zags to reach the crown of the hill. The Government have already promised a large contribution towards the proper making and metalling of the FRIDAY, APRIL 19. fore, have a rival to your Great Western zig-zag on a railway of five or six miles long, two-thirds of which would be made up of zig-zags to reach the crown of the hill. The Government have already promised a large contribution towards the proper making and metalling of the road from kilmore to the station, and as there was nothing left to promise them but a branch railway, the generous promptings of the Ministerial guests almost betrayed them into promising this extravagant absurdity. Dinners, however, are soon forgotten, and it will be a convenience if some after-dinner speeches are also unremembered. Ministers had scarcely recovered from the mild dissipations of Seymour and Kilmore on the opening of the North-Eastern Railway, than they had to start again on another feasting excursion. This one was announced as positively their last appearance upon this particular stage before the opening of Parliament. It took place accordingly at Maryborough last evening, and was attended by the majority of the Ministers. As the Chief Secretary was to deliver another of his popular orations, public expectation was raised, though but slightly, in the hope of some new revelation as to the business to be brought before Parliament. No new light has been thrown upon Mr. Duffy's policy. It is still "National" and "Australian," but of its component parts we heard little or nothing more than he had announced at other places. The speech was in fact but a rechangle of his previous deliverances at Castlemaine and elsewhere. The sense in which the policy of the Ministry may be called "national" is perhaps that it is emimently practical and omits all party questions. It will be difficulty will possibly arise over their financial policy if they have one; but it would almost appear that they have none, and that although they intend like a true "Ministry of action" to proposal commerce that they intend to throw on Parliament the onus of saying how the money is to be found. Parliament, however, will probably insist on the proposal coming fr

A COUTE or Movernes.—A New Zahada and the same and the same of the

with the composition of some sentences, but as the Argus remarks, a commercial man with an extensive business on his shoulders, has hardly time to be particular about his parts of speech.

Mr. Stevenson congratulated his mercantile friends on the improvement which had manifestly taken place in the business of the colony, although he added that the improvement would have been still greater had not our trade been contracted by unwise legislation. The imports and exports of the colony for the past few years were reviewed, and then the intercolonial trade during the past ten years was dealt with, and Mr. Stevenson gave the Government credit for the inauguration of the drawback system, "inasmuch as it showed a desire to partly repair some of the evil effects of the high protective duties, while some intercolonial trade will be saved that otherwise would have been lost." His views in the following paragraph will be endorsed by many of the Sydney merchants, who have advocated the same policy for Sydney. "But (he added) rather than have the most perfect system of drawbacks, I would sweep away Customs duties altogether, and retain the Custom-house for little beyond registration purposes. There is no place in the world in a better grographical position to benefit by absolute free trade than Melbourne; and the exceptional business facilities possessed by Melbourne render it peculiarly adapted, under a sensible fiscal policy, to be the great emporium of this part of the world. The enormous increase of business with neighbouring colonies would enrich the population of Victoria, and instead of manufacturing for a limited home trade, the consumers of our manufactures would increase to a marwellous extent. A property and income-tax (very small incomes contributing nothing) is, in my opinion, a fit substitute for Customs duties, and when the enormous value of the property of the colony is estimated, it is obvious what an insignificant per centage thereon would replace the total of Customs revenue, supposing even that an income

number of miners and the increased supply of geld.

After reviewing the wool and tallow trades, the ex-president speaks of the Border duties thus:

"So great is the importance of retaining the Riverina trade in this colony, and so great the importance to Riverina to be able to trade with this, the nearest and best market, that even a temporary settlement of the difficulty is bailed with delight by both sides; but what has happened before will happen again, and the seconer therefore the Border duty matter is set at rest for ever the better for all parties. Another than the seconer therefore the Border duty matter is set at rest for ever the better for all parties. Another than the seconer than the Border duty in the principal colonies without delay. Both Border duty difficulties and impoliments to inter-cleanial trade would be more effectually removed by this means than any other—supposing, of course, that import duties are ineviable."

He advocated a vigorous policy with regard to

mean than any other—supposing, of course, that import duties are inevitable."
He advocated a vigorous policy with regard to postal services and telegraphic communication. He thinks that Victoria abould undertake the responsibility of the Suez service, seeing the difficulty of agreeing with New South Wales, and that we should charge the other colonies for carrying their letters. Direct telegraphic communication with Europe he described as an undoubted advantage to the legitimate merchant and trader, as it would prevent the accumulation of stocks, while it would soon close the career of those who live on speculation alone. He suggested, that to avoid the inevitable risks of miscarriage of messages arising from breakdowns, and so many repeats on the land line across the Australian Continent and Java, it will sooner or later become necessary to adopt a submarine cable to Galle; and that this permanent line can scarcely be undertaken too soon. After advocating the encoursement of invariance and continents are described to the continents and continents and continents and continents are described to the continents and continents and continents are described to the continents and continents and continents are described to the continents are described to the continents and continents are described to the continents and continents are described to the continents are described to the continents and continents are described to the continents and continents are described to the continents and continents are described to the continents are described to the continents are described to the continents and continents are described to the continents are described cance to Gaile; and that this permanent line can scarcely be undertaken too soon. After advocating the encouragement of immigration, and condemning the interference of the banks with the business of the merchanta, the address concluded with the prophecy of a great future for the colony, especially if our commerce can be extended under free trade.

free trade.

The apprehension seems to be growing that the negotiations and provisional contract with Mr. Webb and Mr. Vogel will, after all, prove a fiasco, and that Parliament will retuse to ratify it. If the New Zealand journals are well init. If the New Zealand journals are well informed Mr. Vogel must have been much less reticent than Mr. Duffy. I stated my belief at the time that the agreement stipulated for each alternate steamer only coming on to Melbourne. Whatever may be said of the absurdity of such an arrangement, I had it upon excellent authority towards the close of the negotiations that such was the stipulation, but it may have been altered before the contract was signed. The arrangement which the New Zealanders say they have secured, that the outward steamers are to sail from hence, to Auckland by way of Port Chalmers and thence along the New Zealand coast, collecting the mails before taking her final departure from Auckland, is certainly more absurd and objectionable than the supposed plan of the alternating terminus, and is much less likely to be approved by our Parliament and public. While the steamer was creeping along the New Zealand coast, our letters would be subjected to such an unreasonable detention that it would be found, as a rule, more convenient to send them by way of Sydney, as we could dispatch them two or three days later than by the direct mail from here. The scheme would, in fact, be fatal to the service. Judgment, however, must be suspended until we have the authentic particulars on the assembling of Parliament.

MINING.

MINING.

RICH stone is reported to have been struck in Campball's lease, Big Oakey Creek, between Sofaia and Waitie Flat. Specimens have been received, and may be seen at Measre. De Boos and Gritton's office.

Five tons of tin ore from the Eismore mine arrived in town yesterday for shipment to England. Specimens of fagot tin from the Ruby Creek Company's ore, and a similar sample from the New Cornwall mine are on view at the Exchange.

MOUNT MITCHELL TIN MINING COMPANY.— The Secretary reports the shipment to London, per Christiana Thompson, of 25 tons tin ore; in store, Sydney, awaiting shipment, 12 tons; in transit to Bydney, saily expected, 17 tons.

THE GREAT MOQUE GOLD MINING COMPANY.— Mesers. Lyell, Whitting, and Co. report that the latest accounts received from this mine state that the tunnel is raking rapid progress, the time being now mere favourable for working. The Oriental engine site is nearly completed, and will be ready for the serection of the machine as soon as it strives.

scree in the Adolong Valley, and the leat of gld 200 feet wide, from 4 to 5 feet thick, runs through the entire longua of the ground. Splendid gold has been struck at both rade of the company's lease. The principal operations up to the present have been devoted to carefully exploring and proving the mine. The ground is now thoroughly proved, and the regular working of the mine has just commenced. Over 4000 feet of drives have been opsted, laying in sight an immense body of washirt, now drained and all ready to block out, which shows plenty of work for a long time to come, and the chief expenses of which have already been paid for from the mine, leaving a handsome profit. From 60 to 100 men are constantly employed on the works; all the winding and pumping are done by vater power. In opining the workings, gold to the value of 2014 has been obtained. The profits on the past fortnight's work an unit 4 to 10 per cent. on the whole capital of the company. In addition to this dividend, all the liabilities of the company, have been paid. The dividend will be payable on Wednesday."

quired. A meeting of the shareholders will be convened in a few days, to appoint office-hearers.

DEATH FROM CONCUSSION OF THE BRAIN.—
Yesterday morning, a man named Edmund Rogers, 47 vars of age, and a tailor by trade, died at his residence, Essex-street, from compression of the brain, resulting frum concuston. Decased was attended up to the time of his death by Dr. Egan. It appears that an Thursdy last decased while in the tailoring shop of Mr. Millett, of George-street, where he was employed, asked his (Rogers) sen, who was also employed there, to take a parcel to the United Child. The son objected to do so, and your words ensued. One of the men who were in the shop interposed, and bit they were struggling. Deceased fell, a ribing the back of his head. It is said ha was tripped up by coming against a sen while attuggling. Deceased was taken heme, where he remained insensible till death too place. At the oleck this foremon the City Goroner will held an isquest on the hody at Jessoy's Naval Brigade Hotel, center of Essex and George streets.

AN UNEXPECTED CATCH.—On Saturday last Meers, finishen, of the Coor's River Tobacoo Munufactry, were fishing at Port Hacking, when one of them hooked, and succeeded in landing, a fine turdle, weighing about 100 lbs. This is the first "fish" of the kind that has been seen in the river, and was caught with an ordinary fishing line.

BYPE.—A well-attended meeting took place in the Council Chamber, Ryds, on Saturday, Agril 20. The chair was occupied by (the Mayer) Mr. K. Terry, who stated that ha had called this meeting took place in the Council Chamber, Ryds, on Saturday, Agril 20. The chair was occupied by (the Mayer) Mr. K. day.

REPORTED DISCOVERY OF GOLD IN THE MACLEAY DISTRICT.—On Tuesday, the 9th instant (says the
Mackey Herald) a party, cannisting of John Barasti and
others, left Kempsey on a prospecting expedition, and
were out all the week without meeting with any success.
On Saturday night it was proposed to return home, but
Barnett refused, and his companions therefore left him.
Next day Barnett, who knows nothing of gold digging or
prospecting, continued his search, and at last came to a
creek, where he, according to his account, saw something,
glittering, and on picking the object up, found it to be a
piece of quartz containing several spece of gold. On Monday,
Barnett made his way to town, and made known his discovery to Samuel Jones, an experienced miner, and Mr. John
Poole. The specimen exhibited by Barnett is said to be a
very good one and a ferre and an and a server server. Poole. The specimen exhibited by Barnett is said to be a very good one, and, as far as we can judge, indicates stiffsctory results. The piece of quarts is considerably worn, and was found, we are teld, in the creek alluded to. The locality of the spot where the specimen is said to have ben found is kept secret, but a mining license has already becauphir for, and the value of the discovery remains to be tested. Another discovery of valuable mineral deposit has been reported to us, and the finder has taken up twenty acres of land in the vicinity of the discovery, but we are precluded from giving further particulars at pres mt. [Out led 18th instant a notice of this reported discovery of gold appeared among the items of news forwarded by electric telegraph. Yesterday afternoon we received from West Kenpacy the following telegram, signed "O. O. Dangar". "Telegram respecting discovery of gold on Meeleay calculated to mislead. No gold has been found."—

An EXPLODED IDEA—Source of our meadons are

calculated to missead. No gold has been found,"—
ED. S. M. H.]

An Exploded Idea,—Some of our readers are aware that in England, among other prizes offered at Agricultural shows, there are unually ten shillings devoted to reward a servant who has been longest in one employ, and snother ten shillings for the married man who has reared the largest family on the smallest wages, without parish help. A stery is related that a winner of the latter prise always took off his hat to a pig whenever he shanced to meet one; on being asked the reason, he replied—"Well, maister, you see pig took a prize of two pun at laist show with ony a litter of serven, what that all been provided for by the owner; well, I showed thirteen that I reared all mysen out o' ten shillons a week, and ony got a prize of ten shillons so I consider the pige above me, and therefore I takes off my hat at the late show of the Western Agricultural Society, held in Esthurat, a special prize was offered by Mr. John Smith to the value of £1, for the female servant who should produce a certificate of the longest constituous service in one place. One solitary competitor appeared in the list of emiries; her service reached 4½ years, and she received the prize. If Mr. Smith had reversed the conditions, and offered a prize for the mistress who had been longest under the distains or her servents to remain for any length of time in one situation is an insult to the independence of the class.

Fire art Albury.—On Thursday morning,

ingot tin from the Ruby Creek Company's ore, and a similar sample from the New Comwali mine are on view at the Exchange.

MOCHT MITCHELL TIN MINING COMPANY.—The secretary reports the shipmant to Londen, per Christians Thompson, of 25 tons tin ore; in store, Bydney, awaiting shipmant, 12 tons; in timusit to Spdney, daily expocted, 17 tons.

THE GREAT MOGUL GOLD MINING COMPANY.—Messrs. Lyell, Whiting, and Co. report that the latest accounts received from this mine state that the tunnel is making rapid progress, the time being now mere favourable for working. The Oriental engine site is nearly completed, and will be ready for the erection of the machine as soon as it strives.

Winnam Gold Company (Alluvial), Adellong.—The manager reports:—"The directors of this company have declared a dividend of twenty-fire (25) per cont. on that full expital. This company was formed in Sydney nearly eighteen months ago. The property comprises 25

Capital £40,000, in 40,000 shares of £1 each. 10s per share on application.
10s per share by 12 o'clock on WEDNESDAY, the 1st ay, 1872, or the deposit forfeited.

This mine is working four rich reefs.
This mine is working richer stone every foot it deepens.
This mine is working richer stone every foot it deepens.
This mine will soon be on the rich stone now being obtained by Beyers and Holterman, adjoining on one side.
Is Rawstherne and Porter's claim, adjoining on the other, a box of specimens is now to be seen at that mine, containing about 500 cn. of gold.
Krobmann's claim, close to Hurley and Moore's, symbolically speaking, is now yielding almost solid gold. The last crushing from the Monte Christo, Hurley and Moore a few days since realized from 106 tons 2870 on, about \$11,500 worth.
This is supposed to be the richest mine hower, in the

Last crushing, 106 tons 2870 oz.

PROSPECTUS

of the
of the
DONKEY HILL, GOLD MINING COMPANY

Capital £5000, in £5000 shares of £1 each, of which the proprietors retain 4000 shares fully paid up, and 4000 shares are offered to the public on the following terms:—2s per share on application; 2s per share on allotment, and calls of 1s per share the shares will be allotted in order of application. Dividends payable on all shares alike.

615 oz.

Statern Reef, which runs through the whole of this lease, was opened 12 years ago by Horsington, Hilton, and Co. Stone from this claim was crushed at the Victoris machine, I oz. 12 dwts., but little work has since been done until within the last six months. Three men took up a claim on the northern boundary of this lesses, from which, in December last, they crushed stone yielding 4 oz. to the ton; and last week specimens were got the equal of which has never been seen in the Adelong.

A small local company was formed last week, and a small lease was taken up adjoining our southern boundary.

It will be noticed that in this Company, although the proprietors are aware that the golden stone has only to be gained after the pumping machinery in erected, they do not ask any cash for their interest, but are so satisfied that the first crushing will return a dividend that they are content to take paid up shares.

The ground is already proved, and the only reason this is offered to the public is because the present proprietors are not in a position to place the necessary pumping machinery on the ground.

This Company is being formed for the purpose of working a Fifteen-arce Lease, situated at Luens, on the freehold property of William Connolly, Eaq., from whom the land has been secured for a term of ten years.

Tuens, as a highly auriferous district, is daily becoming more important, and bids fair soon to take its stand as one of the leading Gold-fields in New South Wales, Victorian miners of great experience expressing their opinion that the character of the ground where the quarts reefs are found more nearly resembles the gold mines of Victoria, which have been remarkable for their depth and richness, which have been remarkable for their depth and richness, which have been remarkable for their depth and richness, which have been remarkable for their depth and richness, which have been remarkable for their depth and richness, which have been remarkable for their depth and richness.

than any other of the auriferous districts of New South Wales.

The "Great Extended" is the adjoining claim to the southward, and is on the same main line of reef as this Company's ground. The "Great Extended" crushed at the Blint at the rate of 10 or. 15 dwts. to the ton, and the stone was Nor picked.

The "City of Sydney," distant about half a mile—and on the same main line of reef—crushed at the Mint at the rate of 71 or. to the ton.

The "Irundad Reef," which, as will be seen by the attached reports, also passes through this ground, and is supposed to be 10 feet wide, HANING BEEN DRIVEN THROUGH AD DISTANCE OF 6 DEEN WITHOUT SHOWING ANY INDICATION OF THE FOOT-WALL, AND CARRYING GOOD GOLD ALL THE WAY, yielded by a hand-crushing 3 or. 5 dwts. to the ton.

The promoters consider that the statement of above facts (corroborated as they are by the attached reports and Mint assays) is sufficient to lay before the public. Any further information can be obtained upon application at the Broker's Ciffice. The Company will be considered as formed when 10,000 shares are disposed of.

SPECIAL FEATURES OF THIS COMPANY.

SPECIAL PEATURES OF THIS COMPANY.

SPECIAL FEATURES OF THIS COMPANY. The small amount required on application and allotment, by which 1000 sharrs can be obtained for £50.

The calls being limited to 3d per share per month. The terms of lease being double the time usually allowed. The facilities afforded for inexpensive working by being enabled to strike the ref at a great depth by tunnelling. Having a water right reserved within a few yards. Plenty of timber being on the ground.

A crushing machine, on most approved modern principles, being on transit to Tuena, for erection within a short distance of the claim.

Directors will be appointed by shareholders.

Dividends psyable equally on all shares, irrespective of the amount peid up.

Directors will be app inted by shareholders.
Dividends payable equally on all shares, irrespective of the amount paid up.

"Peelwood Silver Mine,
"6th March, 1872.

"Messes, R. Rull And Co.
"Gentlemen,—In accordance with the wish of Mr. A.
A. Baker, I visited your fifteen-acre block which you propose to lesse from William Connolly, Esq., of Goulburn, and situated north and contiguous to the lease of the Great Katended Gold Mining Company.

"The spur itself on which your lease is situated, is regular and well defined. The main strata bearing is 10 degrees wet of north, and by superficial examination about 300 feet vertical from the level of the creek. Its western slope in places lays on a nugle of or about 50 degrees, so far as I can accertain. There are numerous parallel reefs running through your fifteen-acre block. The geological formation of the bill is light green and blan slate, which from the appearance of other parts of the locality where sinking has been carried for a depth, will eventually be transformed to a dark blue colour, known as chlorite slate. It is when this strata is reached that I imagins the gold-bearing reefs will be found most prolific in auriferous deposits. The whole of the strata shout this locality dips to the wost on an angle of about 20° The traverse of these reefs is about 10° west of north. This brings it into a direct line with Rule and Barnett's lease (5 acres), of which I am informed that a trial cualing at the Mint gave 71 os. to the ton of quarts. This claim stands about half a mile north of your 15-sere block. I may further state that the whole of the locality is proved to be highly auriferous, but in consequence of it being private property, many obtackes have been thrown against its proper development. The great facilities which the configuration of your lease present will exalle you to work the mine on very economical bases. I have previously stated that there are numerous parallel veins running through the lease. Three of these are known to be suriferous. A sample of sto

"The Promoters of the Northern Great Extended you within 15 feet of No. 3, with good stone; about have been crushed from this claim, the average of the horse or 2 oz. The northern portion of this is only worked to 130 feet level; a large body of at not rich.

Kennedy's shaft, 100 feet; a large reef at bottom, it was not company to the state of the country of the northern great Extended Company.

Kennedy's shaft, 100 feet; a large reef at bottom, the saverage, 2 oz. 2 dwis.

Sumpeon's shaft, down 90 feet level; reef about 6 average, 1 oz. 17 dwis. from this claim; 2 distinct var been worked, and in sc. aral shafts have paid ply well.

Westerly Reef.—Hawington and party worked to and paid splendid; average, 4 oz. 1 dwt. Six men this claim in seven weeks 125 tons, yielding for this claim in seven weeks 125 tons, yielding are so the northern boundary of this lesse, from which, incher last, they crushed stone yielding 4 oz. to the last week specimens were got the equal of which where near they have divers. Taking everything the one of the northern Great Extended Company.

"Gentlemen,—In compliance with your request, I have visited your preperty at The whole of the country in the Tuena district is composed of slate formation. I have been writed the seven as of shaft have visited from the Northern Great Extended Company.

"Gentlemen,—In compliance with your request, I have visited your preperty at The whole of the country in the Tuena district is composed of slate formation. I have day a great of the principal gold-fields in Victoria and the principal gold-fields in any place that I have visited before as I saw at Tuena. Turna being on the claim in seven weeks 125 tons, yielding the country of the lottes of the late of the lottes and must. I think go through it to respect that the reefs will prove equally as rich as the alluvial. The rich reef discovered in the 'City of Sydney Company's Ground is about half-a-mile from the 'City of Sydney Company's Ground. I have been only the country of the lottes and must. I think g

recommending tan property in restment.

"A great deal more might be said as to the value of your property; but as my stay was but abort, and being the first time I have visited the district, I should not like in any way to mislead you, but I believe your venture to be perfectly rafe.

"I am, Gentlemen, your obedient servant, "Wm, M. Connist, Mining Manager."

"W. M. CORNISH, Mining Manager."

"LUCKNOW" GOLD MINING COMPANY

(Limited),

MACQUARIE RIVER.

Capital, £10.060, in 10,000 Shares of £1 each, 5000 shares of which, fully paid up, are reserved by the propietors, and £1000 in each for work. Remarking 5000 shares are now offered to the public at 20s each; 2s 6d on application, belonce as required.

Shareholders to elect directors when Company formed.

It is proposed to form this company formed.

It is proposed to form this company to work a six-acre
lease belonging to a party of twelve in the above locality,
near the "Root Hog," and only about 50 feet from the
River, and known there as the "Julian Cowar."

It is on the King's line of veins, nine or ten of which
have been struck, all bearing good gold, proving the claim
to be one of the very richest in the locality, and the tunnel
is being rapidly driven forward by the present proprietors
No officered in the contraction.

to strike more.

No offers would induce the proprietors to part with any of their valuable property were it not that it is absolutely precessary to have crushing machinery on the ground, for which there is a magnificent site on the river bank. It is also estimated that not more than seven shiftings and sixpence per share of the capital will ever be called up, as crushing can be commenced immediately the machine is erected.

All here

The Directors, finding that so large an amount as 5e (the original deposit and call) will not be required, have determined to reduce the same to 1s per abare, and the calls, which will not exceed 1s per abare, will be made at intervals of not less than one month.

The proprietors of this celebrated claim, better known as Kaight and Co. *s, now offer 9500 shares to the public at par, from proceeds of which they will place £550 to the credit of the Company for working capital, which will be amply sufficient for all purposes.

The above Company is now working a lease on Hawkins Hill, in the midst of the richest claims—viz., Krohmann's, Paxtor's, Brown's, Steven's, Rowley's, Prenchman's, Daddy's Reef, and Dr. Fisher's ; in fact, there is not a claim on the whole of Hawkins Hill offers such inducement for investment as this, and at such a small outlay of capital a sure and certain rotum.

The shaft is down 155 feet, and they are at present driving seat, in order to atrike Dr. Fisher's rich vein. The shaft is 45 feet below the level of Dr. Fisher's tunnel, from which he is getting the good gold; and the drive to the east, from the report of the surveyor, will strike this reef within six feet of where they are at present working.

The property of the company is of the following dimensions—viz, 90 feet on the base like of reef by 600 feet. From the dip of the reefs there is 486 feet of the ground entirely encompassed by them, which will give an almost in-zhaustible supply of gold-hearing stone.

Very little expense will be incurred as far as regards the crushing—the machines being in close proximity, and having a good dray track all the way.

Plan, Specification, and Report of S. C. COATES, Seq., are appended, lithographed on the prospactus, showing the position of the claim.

It is offered to the public on the most reasonable terms.

The proprietary anticipate that a return will be made almost as soon as the allotment.

In fact, it is the coly valuable piece of ground on Hawkins Hill now in the market.

A great number of shares having been taken, there are only about 6000 to allot to the public.

The share list will close on the 25th instant.

Prospectuses and forms of application are to be obtained from

This Company is formed to work a five acre lease—the Fontana Reef, Kirconnell Gold Reserve, near Bathurst. This red was opened hearly nine years ago. From a small lot of stone the claimholders obtained 28 or. of gold. Two tots of quartz carted to a machine several miles away realised ever £2000 worth of gold. A machine, with stampers and Chilian mill attached, was erreted, from which the first crashing, August 16, 1863 (see Bayeuras Times), realized 22 lbs. 3 or. 5 dwts. of gold. After this, five or six bags of quartz yielded 500 or. of gold, the tailings yielding 2 or. to the ton. Allogether, in about four months, £8000 worth of gold was taken from the claim, and yet, notwith-standing this catraordinary return, exactedy anything more was done than to skim the surface quartz; and the party, from some internal disagreement, bruke up and abandoned the ground. The mine was never properly opened, though leaders rich in gold, cropping out on the surface, still remain unworked. No proper shaft was sunk, and the machinery was taken away.

This valuable mine is now in the possession of a number of minors who are desirous of working it under the careful management of a company,—they fully believing it will prove a great success, that no call upon the shares will be necessary, and that the deposite on application and allotment alone will be amply sufficient to constitute the Company and the first class.

A quarts-crushing machine is within a mile and a half of the mines, and carring can be done for 26 de per ton.

Fpecimens, obtained near the southern boundary of the lease, can be seen at E. N. EMMETT'S Office.

Application for Shares to be made to E. N. EMMETT, Greville's Rooms, Sydney; or J. H. BERNEY, Baihurst.

FORM OF APPLICATION.

Dated this day of 1872.

Dated this day of 1872.

Extract from BATHURST TIMES, August 19, 1863.

Fontana Company.

We are credibly informed that shareholders in this Company (the result of whose RRILLIANT CRUSHING we mentioned in our last) have realized out of the two crushings which they have at present had sufficient to pay every capsuse they have incurred, including machinary and the cost of its carriage and erection, and what is more have one hundred and fifty pounds in hand. This fact will be more significant of the richness of the reef in the minds of quartz miners than anything we can write on the subject."

BLUE MOUNTAIN TIN MINING COMPANY
(Limited).

Capital—\$25,000, in 25,000 abores of £1 cm h.,
12,500 of which (paid mp.) are reserved by proprieture, the
remaining 12 5000 being offers 1 to the public.
26 do per share on application, 2s 6d on allotment.
Fu ure calls (if any) at intervals of not less than two
months, and not exceeding 2s 6d per share.
No further calls are, however, anticipated.
Froprietory and subscription shares participate alike,
cal

Little and Pile, Sydney. Pensick and Scott, Brisbane. Marley and Scike, Warwick.

The object for which this company is formed is to work the rich tin deposits on 400 acres of land secured on Kettle Swamp Creek (near Quart Pot Creek), at the foot of the Blue Mountains, a considerable portion of which, as well as both sides of Kettle Swamp for a longitudinal distance of nearly a mile and three quarters, is included in this relection. The ground is thus most favourably situated for a supply of water at all seasons, and with no risk from any excress at any time.

Immense quantities of stream tin are immediately available from the curface downwards over nearly the whole of the area, which can be easily worked, and at a trifling expense. Almost immediate returns may, therefore, be confidently looked for.

From the richness and extent of these deposits, it is the opinion of an eminent geologist, well acquainted with the locality, that the lode exists on the Blue Mountains portion of the selection. The mine is only thirty-five miles from the railway at Warwick, consequently the expense of cartiage, compared with the value of the ore, will be a mere bagatelle, and the extensive smelting works to be erected at Warwick will obviate the necessity of erecting private works.

Assays have been made from four large samples of the ore, submitted to Mr. Watts, showed 77 PER CENT, or PIRE INF-THE LARGEST PERCENTAGE. IT IS UNDERSTOR, FIRSTRACE. THE UNDERSTOR, AND THE ALGEST PERCENTAGE. IT IS UNDERSTOR, FIRSTRACE. THE UNDERSTOR, STENDERS CONTROL OF THE STORY, referred to the Hen. W. Yaldwyn, a gouldeman well known to old Sydney residents. He says:—

Since the ground has been taken up, constant preaperting has been carried on under my immediate supervision, and in all cases the results have been more and more satisfactory, both from the sides of the hill, and from the works.

wise on the reef. Very rich stone is now being raised, and Mr. J. Watt's Asmy Report on the stone (camples of which can be seen at the Broker's Office) is 6 ounces to the ton.

The Claim is on the Northern Pitch, which has proved to be the true and rich run of golden quarts. The last crushing of surface stone (as far back as December, 1888), of 60 tens, yielded I canno 8 dwts. per ton.

The General Mohke will, when properly worked, give employment to 40 nech, and as 3 different first-class crushing plants, all within sight of the claim, are now in course of being erected, extraordinary returns are anticipated; and it is confidently expected this claim will turn out one of the nichtest in New South Wales.

The perfect similarity of the quartz and slate raised from this claim is so great to that of the richest claims on Hawkins Hill, that even the most experienced practised miners would scarcely know the difference.

This claim being on the same line of reef as the now well-known Count Bismark, and being well opened and developed, has raised much richer quartz than ever was obtained in the locality. Besides the rich reefs now being worked many splendid veins have been struck, but have not at prevent been followed or worked.

The absence of any crushing machinery in the locality of this claim hitherto, and the inability of the promoters to creed one, are the sole and only wassen that have feducated.

have not at present been followed or worked.

The absence of any crushing machinery in the locality of
this claim hitherto, and the inability of the promoters to
erect one, are the sole and only reasons that have induced
them to bring it into the market.

Investors and speculators are invited to inspect the
mine for themselves.

There is now about 400 tens of rich stone at grass, for
which the promoters are to be paid the sum of £2500 in
cash out of the first subscribed capital.

Application for shares and further particulars to be made
to the undersigned.

FATTORINI and CO.,

FATTORINI and CO., 175, Pitt-street. (Limited),
Adjoining THE BAND or HOPE COMPANT'S
RICH LEASE,
TUCKER'S HILL, AVISFOND, LOUISA CREEK.

Capital, £5000, in 5000 £1 shares; 2000 fully paid-up theres and £500 cash reserved by the propristors; 3000 theres offered to the public. 25 60 on application, 26 60 on allotment, monthly calls of 1s per share, if required.

allotment, monthly calls of 1s per share, if required.

IT 18 FULLY expected that in THREE MONTHS the Company will be PRODUCING QUARTZ RVEN RICHER than that now obtained in the Band at Hope.

TO SAVE DELAY, THE COMPANY WILL BE TORMED AS SOON AS 2000 SHARRS HAVE BEEN SUBSCRIBED FOR.

DIVIDENDS payable equally on all shares irrespective of AMOUNT PAID UP.

The "NEW EUREKA" is a 10-acre lease, situate on the richest part of Tucker's Hill, Avisford.

It adjoins on the north the celebrated "BAND OF HOPE," and the veins which in this claim have proved se lucrative, as well as the two main reads, run immediately through the "New Eureka". The proprietors have commenced tunnelling from the east to cut these resits, which they expect to do at a depth of from 500 to 460 feet from the crown of the hill, where these resits show on the surfaces.

There are also two very rich easierly reside running through the "Rew Eureka," which have already been proven in the adjoining claim—the "Prospectors;" the result giving an average of 8 or, to the ton. Tucker and Co. are now tunnelling ogain cut these two rests at depth of 600 feet.

There cannot be a contradictory opinion respecting the important value of the "New Eureka," whilst from the resolved and commenced best mode of working it (tunnelling), much expense will be aved, and the result as soon as gold is struck far more satisfactory.

THE TON OF QUARTZ RECENTLY CRUSHED AT THE MINT FROM THE "BAND OF HOPE." TUCKER'S HILL, PRODUCED OVER & OUNCES TO THE TOW.

calles of the expitate to be calred up, it required, in calles of the restant per month.

This valuable mining property is situated in the centre of one of the most highly auriferous districts in the colony, on the line known as the "Spring Creck" reef, shout one nulls from Sofala, and includes the three well-known aclaims of "Belion'a," "Duff, a," and "Carney'a." Three transways have been driven on the course of the "load," one resching a depth of 200 feet. The reef averages 18 inches in thickness, with an underlay of one in tour. A large quantity of stone has already been taken out, the average yield of which has been 2 or to the ton—an cut which grid over obtained was 16 dwts. to the ton. The last crucking driver obtained was 16 dwts. to the ton. The last crucking of 500 tons yielded 680 os. It is estimated that the strue in the deepest portion of the centre transway will yield 3 cz. to the ton.

This property possesses peculiar advantages for working, as the reef has been proved to carry a "soft dig" of 18 inches, which enables quartz to be raised at a very small cost.

As the machinery will be placed on the Company's

To Mr. B. Plashett Rodd, 132, Pitt-street,

THE PLASE PROCEDED WITH.
The "Golden Treasure" is a ten-acre lease, occupying
an important position on the celebrated Thena main
line of rect. A reference to the plan shows that it is
only three pronoves from Mesers. Ends and Barnett's
surferous golden claim which is now (under the style of the
"City of bydray" Quarts Mining Company) before the
public, with a capital of £21,000.

It is also cally two removes from the "Tuena Central" and
one from the "Abercrombic Company's leases," in both of
which very rich gold has been struck, that from the
Abercrombic giving an average of twonty-one sunces to the
loo.

which very rich gold has been struck, that from the Abercrombie giving an average of twenty-one sunces to the two.

The superior quality of the "Tuena" gold is testified by the Mint return last week, which gave the assay of that strucked from Mesers. Rule and Barnett's claim as being of the value of 4.2 s de per oz.

The rich reef from which this was extracted is reasonably believed by most competent judges to extend along the whole line of reef, and this will add one other to those already known to exist in the "Golden Treasure."

The "Golden Treasure" contrasts most favoursbly with the other leases on the same line of reef, as it has an area of d-suble the extent of "Rule and Barnett's," the "Tuena Central," the "Abercramble," &c., &c., and it shows visible reefs from its surface, to which the Company's first operations will be directed. It has also the advantage of an additional valuable reef which runs direct into the "Golden Treasure" from private land.

Reference must be again permitted to the special features in councition with this Company as enumerated above; whilst the provisional directure are so fully assured of the value of the "Golden Treasure" lease that they have guaranteed an amount of money, and the opening out of the visible reefs is now being proceeded with. It is most probable that not more than one half of the capital will be required to be subscrited.

Further information may be had on application to the Company's brokers.

Greville's-chambers, Greville

Capital, £6000, in 5000 shares of £1 each, of which the proprietors retain 2:00 shares fully paid-up, and receive £1000 from first contributed capital; remaining 4000 shares are offered to the public on the following terms:—5s per share on application, 2:6d per share on allotment, balance in monthly calls not to exceed le per share per month. Shares will be allotted in order of application. Dividends payable on all shares equally,

FROVISIONAL DIRECTORS:
A. Sime, Eq.
John Williams, Esq.
C. DeBoos, Heq. BANKERS: Australian Joint Stock Bank

FECRETARY pro tem. : Richard Peck, jun. This Company is being formed to work a five-acre lease, in the Yankee's line of reef, between the Turon and Macquarie Rivers. It will be seen by accompanying report that this lease is very favourably situated, and has the well-known Yankee's Reef, which is 3 feet large, and wherever yet found, carried good payable gold. As a further instance of the high repute in which this line is held, both the Welcome Amalgumated and the Great Tambarrons Companies extended their boundaries to embrace this line of reef at a time when the whole of the land to the eastward was vacan.

The downright shaft to cut this reaf will also cut several other veins containing gold known to exist in this ground, and after the first 20 feet or so the sinking will be easy.

The Share List will only remain open for a few days, and gentienen who desire a really first-class investment should take advantage of an opportunity lits the present. The proprietors are firmly convinced that not more than two or three monthly calls will be necessary to carry down the shaft to the decired depth and cut a payable red.

Applications for Shares to be made to the Provisional Directors; or to RICHARD PEEK, Jun., Greville's Exchange. P R O B P R C T U B Nos. 1 and 2 NORTH RED HILL, TAMBAROORA.

pital £12,000, in 12,000 Shares of £1 each, 4000 fully paid up shares reserved to the Promoters, and £1200 cash; out of which will be defrayed the preliminary represses of brokers, commission, and labour up to the time of formation of the Company. The remaining \$000 shares are now offered to the public, 5s to be paid on application, 5s on allotment, the belance 2s 66 per share per month as required.

BANKERS:
London Chartered Bank, Sydney,

NAUTILUS GOLD MINING COMPANY (Limites).
WELCOME BEEF, TAMBAROORA.

Capital, £500, in 5500 Shares of £1 each,
2500 fully paid-up Shares are re-erved for the proprietors,
and 3000 are offered to the public.
2s to be paid on application and 2s on altoment, and the
balance in Calls of not more than is per Share per
month.
The Proprietors also reserve for themselves £200 in each
for the purpose of parity reimbursing them for their
expense in opening out this property and for placing
it in the market.

for the purpose of parity reimburshing them for their expenses in opening out this property and for pleading it in the market.

This Company is formed for the purpose of working a Five Acre Lease, situated in the very best position in the celebrated Root Hog Line of Reeds, on the asuth side of the Turon, and close to the well-known clades of the Turon, and close to the well-known clades of Court, Sutherland, and Co., the Hawkins Hill Veln, the Swan of Aven, the Levisthan, Star of India, and Great-Randerson, nearly all of the above claims obtaining payable stone at the surface.

In no part of the Tambarcora Gold-dields are the physical features of the gold-bearing reefs so prominent as in this famous locality, and from the richness of the quarta, even at a few feet below the surface, on all the surrounding claims, it may be anticipated that this property will prove equal in value to any of the cisius in the neighborhood.

There are five distinct veins running through the Nantilha Lease, varying in thichness from his inclusion of being gold-bearing, and to be payable from the surface downwards.

There are a party of experienced miners on the ground engaged in opening up the reefs, and a permanent shaft is being sunk which will cut the most promising at about a depth of sixty feet, and the stone that will be than raised will more than pay the working expenses, so that very little more than the application and allotment money will be required before the claim is able to bey a dividend.

There are two crushing machines within five minuteer walk of the claim, approachable by an easy and direct road, and a third is being crusted to be made in the minuteer walk of the claim, approachable by an easy and direct road, and a third is being enables to be a continued on the machine site of the WINDSOR CASTLE of the Castle Gold Minning Co. (Limited), Hill Fig.

CAPITAL: £10,000, in 10,000 Shares of £1 cach. (Dividends to be paid aiks on all shares.)

The proprietors retain 4000 Shares fully paid up, and also £200 in cash out of the subscribed capital, the remaining 6000 Shares are now offered to the public. One shifting on application, one shifting on allotment, after which no further calls to exceed sixpence per month per share.

where no turner calls to exceed sixpence per month per share.

Bank of New South Wales.

Solicitor:

Henry Driver, Esq.

Provisional Sycherany:

James P. M'Gregor, Esq.

Office:

179, Castiereagh-street, two doors south of King-street.

179, Castlereagh-street, two doors about of King street.

This Company is formed for the purpose of working a 10-acre Lease, foot of Hawkins Hill, situate upon the "South Star" and "Clan Campbell" line of reaf, bounded upon the north by the "Southern Cross" lease, upon the south by "Hennesy and Co.," upon the east by Williamson's "Confidence," and upon the west by the "Sir Hercules," all well-known god claims, and within a quastre of a mile of Lewis's Machine. Having such well-known and celebrated claims on its boundaries, this lease needs no exaggerated description, as the splendid reefs in these claims peas through this Company's ground, the outcope being visible on the surface, and in a direct line of the rich claims of Hawkins Hill. The position of this land has a great advantage over all other claims on the South Star and Clan Campbell belt by being enabled through the deep gully adjacent to us to just in a tunnel at a deepth of 200 feets, and cut all the rich velts that run through this land, and it is anti-justed that godd-bearing veins will be struck before we are fifty feet in with the tunnel.

The proprietors, in offering this property to the public on the conditions as started above, feel confident that, with ordinary care in working this mine, it will prove slighty remunerative.

This Company will be ficated as soon as half the number of shares are subscribed for, vin., 3000. The provisional directors will then converse an enecting of the stare-holders, to confirm the deed of settlement and appoint directors.

"To the Provisions of the stare of the stare-holders, to confirm the deed of settlement and appoint directors."

directors will then convene a meeting of the shareholders, to confirm the deed of actimement and appoint directors.

"To the Proprietors of the Windsor Castle G. M. C. "Gentimen.—I have the honour to furnish you with a map showing the area and position of your ground, also the following remarks in reference thereto.

"This leave, area ten (10) acres in extent, is situated upon the South Star Reef Belt, and immediately bounded as follows:—

"Upon the north by the Southern Orose Lease, upon the south by Hennesey and Co., upon the east by Williamson's Confidence, and upon the west by the Sir Hervales.

"With the exception of the breaking of some stone from the numerous lode outcrops, no mining operations have as yet been commenced in this claim; we therefore know but little as to the value of this ground.

"The outcrop of at least six (5) well defined quarts lines are visible, and the quarts in at least two lodes is of an attractive character.

"Northwards from this lease property the claims known as the South Star, Clan Campbell, Battlears, Cure, and Southern Cross have been carefully surveyed, and the lodes traversing them placed in position, and from such survey I find that the South Star system of lodes traverses this ground.

"The method of working to be adopted by you is undoubtedly the driving of a tunnel from the main creek to the eastward, such tunnel could penetrate your claims at a depth of at least 200 feet below the main surface, and if such system of mining be adopted I can recommend the Windsor Castle Gold Mining Co.'s claim as a mining venture.

"I have the honour to be, Gentleman,
"Your obedient servant,
"J. J. Coares, C. E., Mining Engineer."

SPECIAL NOTICE.—The claim on Hawkins Hill well-known as Mathewen's and party has been placed in Mr. JOHN HURLEY'S hands for formation into a Company, and r the name of "Shakapeare."

Particulars will appear in a few days.

Bank-chambers, conter George and King streets,

PROBLEM OF RECOMMENT OF THE COMPANY (Limited)

MACQUARIE RIVEN, HILL RND, OPPOSITE CHAMBERS'S CREEK.

CHAMBERS'S CREEK.

Capital, £3500 in 3500 £1 shares,
From which the propristors reserve 1000 fully paid up,
and the remaining 2500 are now offered to the public.
Terms: Is on application, is on allotment, and the
balance (as required) in monthly calls not exceeding 1st
expenses.

The propristors will receive £250 from first
capital to compensate them for work already done, and to
cover the whole cost, including brokerage of expenses until
this Company is formed.

Expenses a statement of the cost of the annexed report from the estremed mining engineer, Mr. B. Frappell,
and since it was eritent THE WBOLE OF THE VEKNS
HAVE BEEN THOROUGHLY TESTED, tunnelling
has been commenced, and it is expected to strike payable
gold at 20 feet.
The quarts now on view at the broker's offices is well
worthy of attention, and would warrant the Five-scre
Lease being placed in the market at a much higher capital
Chamberr's Creek is distant about balf a mile direct south
from the "Parageon" and the similarity of the stons
from the "Parageon", and the similarity of the stons
from the "Parageon" and Allen's celebrated claim, and
also the "General Bouten' (Bismark) line of rest, can
only be accounted for by the fact that the same rest runs
through the "Parageon".
The mode of working will be inexpensive, and Mr.
JAMES O'BRIEN will be o'Contention.

The mode of working will be inexpensive, and Mr.

a few feet from Bent-street, bounded on two sides by the
grounds attached to
THE UNION CLUB.

RICHARDSON and WRENCH have re-ceived instructions to sell by public auction, at the Rooms, Fitt-street, on FRIDAY, 26th April, at

lo'clock,
ALL THAT PIECE OF LAND, commenciar on the
western side of PHILLIP-STREET, and bounded
on the east by PHILLIP-STREET 42 PEET 9
INCHES, on the north by the Union Club ground
57 feet 6 inches, on the west by the Club ground 44
feet 9 inches, thence on the south by a line 73 feet
to the point of commencement, together with the
wooden Cottage, No. 105, Phillip-street.

A very eligible site for two or three houses, a few feet south of Bent-street, and surrounded on two sides by the highly improved grounds of the Union Club.

For particulars of title apply to Mosers, STEPHEN and STEPHEN, Solicitors, Pitt-street. Terms at sale.

To Shipowners, Shipwrights, Steampacket Companies Wharingers and others.

VALUABLE WHARF PROPERTY.
THE PATENT-SLIP AND WHARF,
sex-street, and with right of entrance from the foot of
KING-STREET, opposite the COMMERCIAL
WHARF, together with the FOUR PRODUCE
STORES in Summartered.

RICHARDSON and WRENCH have re-

cived instructions from John Cuthbert, Esq., (in consequence of his projected departure from the colony,) to sell by public auction, at the Rooms, Pitt-street, on FRIDAY, 26th April, at 11 o'clock,
That well-known valuable property,
THE PATKNT SLIP,
DARLING HARBOUR, SUSSEX-STBEET, together with steam-engine, cradle, and apparatus complete, in full trade and in first-rate order, capable of taking up vessels up to 600 tons burthen, and now yielding a return fully equal to £1000 per annum.

The property has a frontage of 67 feet to Sussex-street, with considerable depth (about 300 feet) extending to the karbour, to which it has also a large frontage.

The block contains an ares of about 2 ROODS 12 PERCHES, for which there is a CERTIFICATE UNDER TORRENS'S ACT, and in addition PERMISSION HAS BEEN OBTAINED still further to extend into the harbour to the extent of nearly A QUARTEE OF AN ACRE.

On the Sussex-street frontage are four 2-stery recentive.

into the harbour to the extent of nearly A QUARTER OF AN ACRE.

On the Sussex-street frontage are four 2-story recentlyerected PRODUCE STORES, with extensive shed basement on a level with the wharf. These stores are at present
let, without any connection, or interfering in any way, with
the working of the slip and wharf.
Independent of its value as a patent slip, the property
occupies the most valuable position on the harbour for a
COMMERCIAL WHARP, which would command an extensive business in connection with the coasting and
intercolculal trade.

Extracts from the books showing the earnings of the
Slip for the last two years can be inspected, and further
particulars obtained at the Recens, where also Plan and
Survey of the land, as per certificate, can be inspected, and
sketch of the portion for which permission has been obtained to reclaim.

spected.
TITLE DEEDS can be referred to on application to
JAMES HART, Esq., Solicitor, Elizabeth-street.
Terms at sale. POSTPONED TO PRIDAY, 3rd MAY.

TO CLOSE A TRUST ACCOUNT. MURRURUNDI. THE ROYAL HOTEL, situated in the Town of Murrurundi, the Terminus of the Great Northern Railway. TERMS will be herestler sanounced.

MESSRS. T. and A. CADELL have re-MESSRS. T. and A. CADELL, have reBetate of the late P. Brodie to sell by anotion, on PRIDAY,
3rd May, at 12 o'clock, at the Northumberland Hotel, Week
Maithand,
The Reyal Hotel, Murrarundi.
This valuable property is well known as one of the most
complete establishments on the Great Morthern Bond. The
principal building is of brick, almost new, and contains a
sarge number of rooms. The stables are of stone, and it as
outbuildings all in encellent repair, and perfect in construction and arrangement. The situation of the propertyin the town, that must be for many years the terminus of
the Great Morthern Reilway, now nearly completed to
Murrarundi, insures to an enterprising purchaser most
satisfactory roturns; and being the only hetel in Murrurundi, it can command one of the most extensive businesses out of Sydney, and the profits would enable the
possessor in a short space of time to enams a handsome
composency.

For further particulars arenly to the Austienses. West
